Base rules:

After relay with fit with 5530 we show 3, after relay no fit, we decide. We have void priority.

To apply models we give fit in 2/3 levels. If we already bid 2nt natural we user fits by steps. If we didn't – we apply only natural fits. If we have only one free bid before 3nt – it's fit on farest suit. Other bids are cubids in nearest suit. After relat with fit we play in this suit except if we found 6/3 hearts after 2spades relay with 4/4.

4. Transfers and some defence

4.1 First level intervention

In position 1x-(1y/dbl) we always play transfers. Base rules: if we can give transfer on 1st level, on 2nd trf is GF or weak, on 3rd INV; after 1M-(dlb) starting from 2nt as w/o dbl, direct fir is 8-10, trf 4-7 or INV+. After 1* intervention 1nt not natural; 3rd level before opp suit is natural, after – trf; after trf to M we can bid 1nt with 3M
